## Summary

Committed job seeker with a history of meeting company needs with consistent and organized practices. Skilled in working under pressure and adapting to new situations and challenges to best enhance the organizational brand.

## Key Achievements

### Client Issue Resolution

Resolved client server issues monthly, improving client satisfaction ratings.

### API Integration Success

Successfully integrated few third-party APIs, ensuring seamless data flow and interactive site features.

### MERN Stack Certification

Completed 6-month MERN stack course, enhancing web development skills and projects

## Experience

### Labmentix

Remote

#### Web Development Intern

03/2025 - Present

- Assisted in designing, developing, and maintaining responsive websites and web applications using HTML, CSS, JavaScript, and React.js, Nextjs,Typescript.
- Participated in code reviews and agile development cycles, gaining exposure to Git version control and modern development practices.
- Developed user-friendly interfaces using Tailwind to enhance user experience and interface responsiveness.
- Implemented reusable components and optimized existing UI for speed and performance.
- Worked closely with UI/UX designers to translate designs into fully functional web pages.
- Contributed to backend development using Node.js and Express.js, including API creation and database integration with MongoDB, Firebase and Supabase.
- Built and tested secure authentication modules using JWT , Clerk, Next-Auth and session-based systems.
- Wrote modular and maintainable server-side code following RESTful principles.
- Deployed the application using cloud services like Vercel and managed database operations.
- Gained hands-on experience in modern web technologies including React.js, Node.js, MongoDB, and Git during the internship.
- Developed mini-projects to apply theoretical knowledge in real-world scenarios under guidance from senior developers.
- Improved understanding of responsive design, API consumption, and component-based architecture.
- So far done with 4 projects in this internship : Text-to-Speech conversion App, Uber Clone App., E-Commerce Store and Reddit-Clone App.

### Solar Secure Solutions

Remote

#### Web Developer Intern

08/2024 - 10/2024

- Assisted in the development, testing, and maintenance of web applications using HTML, CSS, JavaScript, and frameworks like React.js and Node.js
- Collaborated with senior developers to create responsive and user-friendly web interfaces that enhanced the user experience
- Participated in front-end and back-end development tasks, improving website functionality, and optimizing performance
- Wrote clean, scalable, and well-documented code while following best practices and coding standards
- Gained hands-on experience with version control tools, specifically Git, for code management, and team collaboration
- Supported the integration of APIs and third-party services, ensuring smooth data flow and interactive features on the site
